

Easy Breathing

A complementary feedingstuff for horses.

NAF Easy Breathing contains a range of herbs specifically chosen for their benefit to lung tissue integrity.

The life of the modern riding horse can often challenge his respiratory system. Stable bedding, indoor schools and horse boxes can all harbour dust and fungal spores which could accumulate and irritate the airways. In the wild the horse had access to a wide range of vegetation to suit all his nutritional needs, and could specifically select those required. Unfortunately due to the limited number of species on modern pasture the horse can no longer make that choice. Herbs traditionally used for respiratory stress include garlic, capsicum and althea. Garlic has been used medicinally since ancient and medieval times and is an excellent herb for supporting health. Capsicum may help to remove accumulated mucous by promoting the mucociliary response. Easy Breathing contains a herbal blend including garlic, capsicum and althea for maintenance of the respiratory system.

Legal Category:

A complementary feedingstuff.

Package:

1kg, 3kg & 8kg tubs.
A 1kg tub is sufficient for 20 days supply.

Instructions:

4 measures (50 g) per day, mixed in feed. Easy Breathing is a concentrated combination of herbs and would be better fed in divided quantities over 2 or 3 feeds. It is best added to damp feed.

Storage:

Store in a dry place. Replace lid after use.

Contents:

Protein 15.2% Ash 8.10% Fibre 20.6% Oil 1.1% Moisture 10.4%.

Ingredients:

Althea, Anisum, Garlic, Urtica, Berberis, Capsicum.

Key Ingredients:

Althea, Anisum, Garlic, Urtica, Berberis, Capsicum.
