

## Leather Cleanse

A one step leather cleaner.

**Legal Category:**  
Leather Care

**Package:**  
400ml bottle, 500ml spray.

Tack cleaning for the 21st Century!

NAF are renowned for their pioneering approach to nutrition for horses. Now we have turned our attention to tack! In consultation with a professional saddler and utilising many years research, we have produced the most technologically advanced leather cleaning system on the market. When it comes to tack care, most of us follow old fashioned practice. Saddlers have been aware for many years that this method of cleaning does not improve longevity of your tack. Using water to clean, only smears the dirt and grease around, impregnating it further into the leather, whilst a topping of glycerine may shine, but over the years it builds up on the leather, fully impregnating it and eventually weakening and destroying the fibres. NAF Leather Cleanse is a powerful deep cleansing solution that cleans and supple tack without denaturing the leather. With a well wrung out sponge, massage the Leather Cleanse straight on to dirty leather. The light lather will easily remove dirt and grease, while leaving your saddlery soft and supple. There is no need to apply a separate coat of saddle soap, so the job is done in half the time!

### Instructions:

With a well wrung-out sponge, massage directly onto dirty leather. Use the light lather to remove dirt and grease, whilst leaving the leather soft and supple. As with all new products apply to a test area first.

### Storage:

Store in a dry place. Replace lid after use.
