

Five Star Oestress

A complementary feedingstuff for support of hormonal equilibrium.

Hormonal imbalances can cause mood swings, hypersensitivity and poor performance.

It should always be remembered that mares are 'entire' horses, and as such can be prone to hormonal imbalances. These can be seen in a variety of ways, including poor performance, reduced movement, hypersensitivity to being touched and becoming cold-backed. However, the most common problem is mood swings when even the sweetest mare can become unpredictable and aggressive. These problems can be addressed with hormonal additives but many are far from ideal and are not suitable for long term use, creating a need for nutritional approaches. In the wild the mare could supplement her own diet with herbs specific for her needs, but this is not possible with modern pasture. Oestress contains a range of natural materials providing anti-oxidants: glutathione, vitamins and minerals, carotenoids, bioflavonoids and trace elements chosen to support hormone regulation. Oestress contains a combination of natural ingredients specifically chosen to help combat 'marish' behaviour. Just as an army can not fight without supplies and communications, the equine body can not fight and repair damage without the help of well formulated nutritional supplements.

Legal Category:

A complementary feedingstuff.

Package:

500g, 1kg & 2.5kg.
500g will last 50 days at the low maintenance.

Instructions:

High feeding level: 2-3 scoops per day (20-30g) Maintenance level: 1-2 scoops per day low level: 1 scoop per day.

Storage:

Store in a dry place. Replace lid after use.

Contents:

Protein 13.1% Ash 7.84% Fibre 8.2% OI 5.2% Moisture 9.4%.

Ingredients:

Aromatic and appetizing herbs, calcined magnesite.

Key Ingredients:

n/a
