

## Pink Powder

Condition perfect.

Nutritional support of the gut is the cornerstone of health and vitality in horses, and will be reflected as a horse in perfect condition.

### The Concentrated Feed Balancer

The modern equine life of processed feeds, competition, work and travel can result in both nervous and metabolic stress, seen as a lack of condition. To improve the diet NAF Pink Powder is one of the most advanced nutritional preparations available today for use with sport and leisure horses. Pink Powder's unique combination of vitamins, minerals, trace elements and amino acids ensures that your horse has all the nutritional tools to do his job. Pink Powder maximizes nutrient absorption with live yeast, as the more efficiently the food is broken down, the more efficient the repair mechanisms and the greater the output. For every equine life, Pink Powder maintains perfect condition.

### The "Pick-me-Up"

At some time all horses will need a "leg-up" back to peak health. Anti-biotic therapy, a change of stabling, different diet or physical trauma can have debilitating effects on the micro-organisms of the gut and, hence, condition and performance. Feed Pink Powder as a 30 day "pick-me-up" to kick-start the digestive system. Following a month's concentrated use maintain perfect condition by feeding Pink Powder at the Feed Balancer levels.

#### Legal Category:

A complementary feedingstuff.

#### Package:

700g, 1.4kg, 2.8 kg & 10kg.  
A 700 g tub fed at 16g per day will last 43 days.
